Specification Amendments**Replace the following paragraph that starts on page 6 of the specification:**

In one example, the module component 112 employs the command to control one or more of the electrical devices 114, 116, 118, and 120. The user 124 of the mobile communication device 102 in one example may send a message to the ~~to-the~~ module component 112 through the X10 gateway component 108 for control of the electrical appliances 114, 116, 118, 120 in response to the triggers. For example, the user 124 sends the message to advise the X10 gateway component 108 to turn on the electrical device 120 in response to a temperature decrease. Where the triggers comprise the temperature decrease, the electrical device 120 comprises a heater, and the module component 112 comprises the temperature sensor, the X10 gateway component employs the module component 112 to turn on the electrical device 120 in response to the temperature decrease.

Replace the following paragraph that starts on page 7 of the specification:

Upon receipt of one or more of the response message, the picture, and the video, the X10 gateway component 108 sends one or more of the voice message, the short message service message, the email, and the multimedia message to the mobile communication device 102. In one example, the X10 gateway component 108 sends the one or more of the voice message, the short message service message, the email, and the multimedia message to the mobile communication device 104. The mobile communication device 104 sends the one or more of the voice message, the short message service message, the email, and the picture through the mobile network component 106 to the mobile communication device 102. In another example, the X10 gateway component 108 sends the one or more of the voice message, the short message service message, the email, and the picture to the modem component 204. The modem component 204 sends the one or more of the voice message, the short message service message, the email, and
